

Updated '*Stecker*' button 8/12/2001
new pin fixture #17 and #18.

'Stecker' Replication .

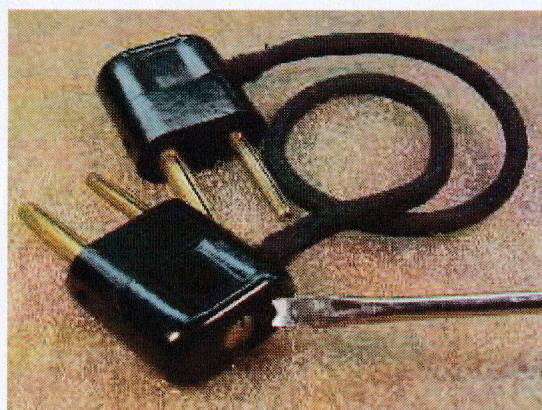

Completed 7/30/2001

Shown at the left are two completed Replica '*Stecker*' cables. Move your mouse over the image at left to see the original M4 '*Stecker*'.

#1

This is a "real" '*Stecker*' from David Hamer's M4 Enigma. Note the special ground screwdriver necessary to remove the top screw/nut.

#2

A view inside the '*Stecker*' shows numbers and markings on the inner top case half. These are faithfully reproduced in the replica molds.

#3

Before pouring the mold, a high vacuum must be pulled to rid the mold of air bubbles/ We must get to 28.5 "Hg

#4

After the vacuum pull, the mold is poured around the part. This is a very "safe" process to use on historic parts.
